

I would wholeheartedly support the council applying for bathing status to ensure water testing and clean up is done. Unfortunately my daughter got sick from swallowing water last year and we love to swim and paddleboard and use this incredible facility we have available to us

I'd also like to see a splash area - similar to the parks in Abingdon and Wallingford. With temperatures increasing year-on-year, a place to cool off and for young children to play would be a great addition to the village.

Agree wholeheartedly with the suggestion to apply for bathing water status for the River Thames within the parish - this puts the river into the same category as sea bathing waters and it is then regularly tested from May to September by the Environment Agency. Signage then shows the current status, from Poor to Excellent. A location for a protected area for river swimming would vastly increase the number of people in the village willing to use the river for swimming. We have a wonderful natural resource right in the centre of our village, lets use it to its full potential, but safely
