

WGW SMART Audit is a cloud based internal audit service which utilises workflow audit tools to provide individually tailored internal audit programmes for small to medium sized third sector organisations including Town, Parish, Community Councils and Charities in England and Wales. Our unique service provides the facility to:

- Uniquely identify and time-stamp all files provided for audit purposes.
- Eradicate the need to review or retain paper files.
- Provide a transparent audit-trail of all interactions between the auditor and your Council.
- Identify all Internal Control risks and Regulatory Compliance issues.
- Ensure that complete and verified documentation in support of the audit process is maintained – available on a read only basis by your organisation to review.
- Eradicate incomplete or inadequate internal audit processes.
- Facilitate comparative analysis, using anonymised data, to review the performance of councils within a like-for-like peer group.
- Using the remote WGW SMART Audit service we are able to reduce the carbon footprint of the Internal Audit process.

WGW SMART Audit clients are provided with a secure portal and audit dashboard which allows them to upload all required audit documentation and to view each stage of the audit process as it progresses from initial documentation upload to the detailed internal audit report being issued.

WGW SMART Audit uses workflow processes which are compliant with the statutory Internal Audit requirements for government organisations, including Town, Parish, Community Council's and Charities in England and Wales.
