

Removal of graffiti on Railway Bridges

The Committee are asked to approve action to remove graffiti from railway bridges in Goring, subject to all the necessary permissions and safety measures being in place before any work begins.

Graffiti has now been removed from the Wallingford Road Overbridge, the photos below show the extent of graffiti on the Leathern Bottel Overbridge:

Other railway bridges are equally affected. Apart from being unsightly, graffiti can create an impression that the area is unsafe or threatening and deter walkers and cyclists. Prompt and effective removal of graffiti can also reduce the likelihood of reoccurrence.
