

Appendix A Gardiner Desire Path

There is a path of desire at the corner of Gardiner field at the Upper Red Cross Rd/High St corner. This section is now considerably worn away as the above left photo indicates. This seems to reflect the path of walkers heading from the station towards Cleeve Rd. There are concrete steps within 50m, as above right, but hidden from sightlines behind the pavilion. Should we consider creating steps at the point where people are accessing Gardiner? The first step would be to get indicative costs of the project.

The Playgrounds Committee intend to create a focus for teenagers in this area on Gardiner.
